

Clean Air Partnership

Government, Business, Industry, and Environmental Groups Working Together For Cleaner Air

CAP Membership

The Clean Air Partnership was founded in 1997. The group, made up of business, industry, government, and civic organizations is responsible for many activities associated with the "Spare the Air Campaign." This campaign encourages voluntary action to reduce specific types of air pollution that contribute to the formation of ground-level ozone.

Requirements for Membership:

Minimum requirement:

Receive and distribute ozone forecast information.

Better:

Educate your audience. A variety of materials are available from the DHEC's Bureau of Air Quality.

Best:

Provide incentives for reducing vehicle miles traveled. Telecommuting, van pooling, car pooling, and staying in at lunch are especially important on days when ozone concentrations are high.

Why you should be a Clean Air Partner:

Membership in the CAP will demonstrate environmental stewardship and show corporate citizenship. You will be a part of the proactive approach to air quality concerns in South Carolina.

I am interested in becoming a member of the Clean Air Partnership!
